

To whom it may concern,
I respectfully urge you to reject NAB's petition 04-160. I pay my hard earned money to receive quality digital broadcasts that I cannot receive via traditional radio broadcasting, i.e. traffic and weather broadcasts. These are vital info that is a service to the public. The National Association of Broadcasters should not be able to dictate who can and cannot listen to digital radio.

Thank you for your attention and action to keep digital satellite radio and its public benefitting information available in this free market economy that we live in.

Thank you.

Tony Bailey
